Quick & Easy Optimal Arc Stability

www.weldmax.com.au

Key Features & Benefits

With separate wire feeder suitable for MIG/MAG (manual, synergic, pulsed, double-pulsed and root welding), TIG-DC (continuous and pulsed) & MMA welding. The large 3.3" display shows all welding parameters, making setting easy & intuitive. In synergic/pulsed MIG/MAG welding, the microprocessor ensures easy & quick setting of programs guaranteeing optimal arc stability.

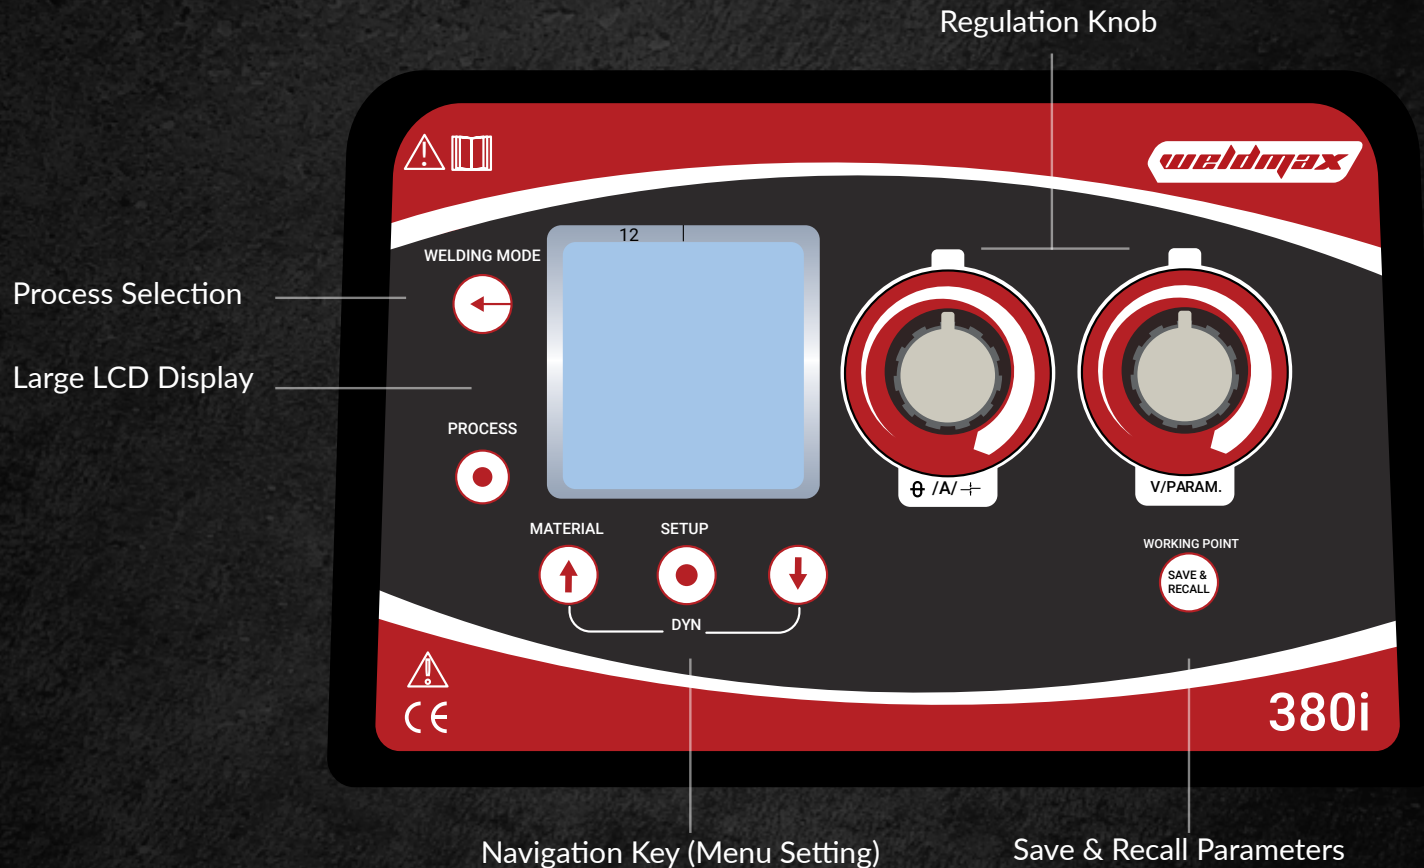

FEATURES:

- Portable separate wire feeder with heavy duty wire drive system
- 4x4 Geared Drive & Pressure Rollers.
- Simple and Intuitive screen design for easy operation.
- 5- 360 amps welding range.
- Euro Torch Connection.
- Superior Inverter processor controlled.
- Overtemp Protection.
- Reverse Polarity For Gas or Gasless Wire.
- Trigger Latch, Switch & Spot Control
- Thermostatic Fan CoolingTIG-DC

is all about high quality and lean manufacturing which is now a premium name in the welding industry – and you can be guaranteed that we care the most.

With the recent inverter additions and enhancements to the product line up, Weldmax now has products suited to a wide field of uses starting from welding in the garage to heavy boiler making and structural steel, stainless manufacturing, aluminium fabrication & boat building.
